# G-series for Avid® Artist Series

**G-Series** begins with studio presence - sleek, individual, and seductive. Engineered from experience. Distinctive styling and build quality are industry shaping and head turning.

Calculated lines of the G-Series enable unobstructed line-of-sight and line-of-sound while putting every essential control at your fingertips. Elevated chassis provides transparency to low frequencies, while the pitched surface and perforated grills intentionally foil early sound reflection and defeat build-up of standing waves.

Steel chassis rail and leg system support 19-32mm powder coated mdf components for unparalleled support of your studios most vital equipment.

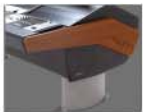

G-series is available in a variety of set-ups for your Avid® Artist Series configuration. With rack and trim options, you can spec out your own customized G-series desk.

Configure your G22 for Avid® Artist Series online at [www.ArgosyConsole.com](http://www.ArgosyConsole.com)
